DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Yagi *et al.* (JP 2000-290431).

Yagi *et al.* discloses a process comprising formulating and kneading 100 pw of rubber component, 5-100 pw of silica, 2-20 wt % of silane coupling agent (based on the weight of silica), and water or an acidic aqueous solution in an amount of 2-20 wt % based on the weight of silica (abstract). Overall, the water content of silica does not exceed 20 wt % (paragraph [0021]). Kneading takes place at an elevated temperature (120-180 °C) in a first pass, or blending stage (paragraph [0027]). The vulcanization occurs during a second pass, or stage in which the temperature is lowered to about 50 °C (paragraph [0042]). In sum, the subject matter of the instant claims is adequately disclosed in the prior art.
